

PIELC 2022 PROGRAMMING

Sunday, March 6th

1:30-3:00 PM

Climate Emotions Conversations

Climate Emotions Conversations are small group sharing and listening sessions for anyone in pain about the climate emergency. Guided by videos and conversation prompts from clinical psychologist and climate activist Margaret Klein Salamon, you'll find a space to express yourself, be understood and connect with others about the human experience of living in this age of crises.

Conversations take place in groups of 3-5 and last about 70 minutes. For top functionality, use a laptop or a tablet and a Chrome or Safari browser. If you join from a phone or another browser, the technology may not work.

2:30-3:45 PM

The Tohono O'odham and the US-Mexico Border*

The Tohono O'odham Nation includes 62 miles of international border. Long before there was a border, tribal members travelled back and forth to visit family, participate in cultural and religious events, and many other practices. This panel will discuss the destruction caused by the border wall and border patrol, as well as the forced separation imposed on the tribe's people.

Panelists: Amy Juan (International Indian Treaty Council) & Nellie Jo David (University of Arizona Law)

3:00-4:00 PM

How Climate Change is Affecting Landslide Patterns

This panel will focus on how changes in climate and precipitation are changing landslide patterns.

Panelists: Josh Roering (University of Oregon) & Steaphan Harrison (University of Exeter)

2:00-3:15 PM

Environmental Justice and the Historic Exclusion of BIPOC in Environmentalism

This panel will focus on the historic exclusion of BIPOC from environmentalism and the lived experience of BIPOC people in the movement.

Panelists: Jennifer Rushlow (Vermont Law) & Katie Moreland (Oregon Law)

3:30-4:45 PM

Climate Education: Empowering Youth to Get Involved in Climate Action

This panel will look at how we can properly talk to and educate our youth about the climate crisis. We would like to inform young people about the problems in the world while empowering them to take positive action.

Panelists: Andy Beckman (UNC school of social work (PhD candidate)), Sarah Stapleton (University of Oregon), & Sarah Ruggiero Kirby (Oregon Educators for Climate Education)

4:00-5:00 PM

Contamination of the O'ahu Aquifer and the Movement to Shut Down Red Hill*

This panel highlights the contamination of Hawaiian drinking water by the U.S. Navy-managed Red Hill Bulk Fuel Storage Facility, and the fight of Hawaiians to shut down Red Hill for the protection of Hawaiian water sovereignty and public health.

Panelists: Sierra Club of Hawaii: Wayne Tanaka, David Kimo Frankel
